

JOYSTICK DOCKING FOR STERNDRIVES

THE FIRST AND ONLY STERNDRIVE WITH JOYSTICK DOCKING

The all-new Axis® sterndrive propulsion system from Cummins MerCruiser Diesel takes the dread out of docking, even in strong wind and current. Move sideways, in a circle, or diagonally – all with a simple touch of the joystick. Or push the Skyhook® button and maintain position and heading until you're ready to move. It's groundbreaking control and it will change your boating experience forever. Want to hear more? Call or visit our website today.
